Experience

Heroic Cybersecurity

Jun 2025 – May 2026

Senior Flutter Developer

Remote (US)

- Led the complete revamp of HEROIC Guardian using Clean Architecture and BLoC, improving scalability, modularity, and maintainability.
- Owned the full product lifecycle of HEROIC Guardian across Android and iOS, including analytics, crash monitoring, user reviews, retention, and app store optimization; grew downloads from 200 to 10,000+ with steady ongoing growth.
- Engineered the full IAP subscription lifecycle (validation, restoration, receipt handling), reducing subscription failures by 35%.
- Implemented Firebase Crashlytics and Analytics, reducing crash rate by 28% and improving onboarding insights.
- Architected a Windows security agent in Flutter and Go with secure IPC and JWT authentication for real-time osquery telemetry.
- Led mobile performance monitoring via Play Console and Firebase, delivering weekly KPI reports and A/B testing insights.
- Led the complete UX revamp of InternetGuard VPN and reduced ANRs by 40%, raising Play Store rating to 4.0+ and contributing to download growth from 1M to 1.5M+.

HiFX IT & Media Services

Sep 2023 – Dec 2024

Senior Flutter Developer

Kochi, India

- Architected and developed a Single Sign-On (SSO) solution for Manorama applications serving 10M+ users with Google and Apple login integration.
- Led migration of native Android and iOS app Hello Address to Flutter, unifying codebases and improving development velocity and maintainability.
- Applied Riverpod within a Domain-Driven Design (DDD) architecture to improve scalability, modularity, and separation of concerns.
- Automated CI/CD pipelines using Jenkins, reducing release deployment time by 60% and eliminating manual release errors.
- Integrated Stripe and native in-app payments, increasing subscription conversion rate by 22% and ensuring PCI-compliant transactions.
- Established unit, widget, and integration test coverage to 75%, reducing post-release defects by 30%.

Seeroo IT Solutions

Dec 2019 – Aug 2023

Flutter Developer

Kochi, India

- Built and scaled 5+ production-grade Flutter applications using BLoC, Provider, and GetX within MVVM and Clean Architecture patterns.
- Reduced application crashes by 90% through debugging, profiling, and performance optimization.
- Integrated secure payment gateways (Freecharge, Payfort) and Firebase Cloud Messaging (FCM) for real-time engagement.
- Engineered advanced geolocation modules (reverse geocoding, background tracking), improving location accuracy by 25% and reducing API response latency.
- Integrated AWS Amplify services (Cognito, Lambda) for secure authentication and scalable backend communication.

Shipped Products

HEROIC Guardian — Breach Monitoring & Cybersecurity Mobile Application [Android](#) [iOS](#)

InternetGuard — VPN Firewall & Privacy Protection Application [Android](#)

Hello Address — Real Estate Mobile Application [Android](#) [iOS](#)

BuddyGuru — Music & Arts Social Platform [Android](#) [iOS](#)

Unidoc — Healthcare Appointment Scheduling Application [Android](#) [iOS](#)

Technical Skills

Languages Dart, Go, Kotlin, Java, Swift

Frameworks Flutter

Architecture Clean Architecture, MVVM, DDD, BLoC, Riverpod, Provider, GetX

Backend & Cloud REST APIs, Firebase, AWS Amplify (Cognito, Lambda)

Payments Stripe, In-App Purchases

DevOps & Tools Jenkins, Codemagic, Git, GitHub, GitLab, Android Studio, Xcode, VS Code, Postman

Practice Agile, Scrum, Jira

Education

Bachelor of Science in Computer Science — Calicut University, Kerala

2014 – 2017
